Office Phone:	303-735-5507
Classroom & time:	Muenz E113 MWF 1:00 – 1:50 pm
Class Website:	D2L

I. COURSE DESCRIPTION AND OBJECTIVES

What happens to trade, foreign direct investment (FDI), and offshoring when a country raises a tariff of 35% on the goods that it imports? Who gains in terms of welfare, and who loses? The subject of international trade deals with the movement of goods, services, people, capital and ideas across borders. It covers topics such as why countries trade, what are the benefits from trade and factor movements, and the outcomes of various trade policies. The primary objective of this course is to introduce you to international trade theory and policy. This course consists of two parts. In the first part, we will study various models of trade including Ricardian, specific factors model, the Heckscher-Ohlin model and the standard model of trade. In addition, we will look at issues of globalization, FDI, and offshoring. In the second part of the course, we will shift to the instruments and outcomes of trade policy, looking at the impact of tariffs, quotas, and subsidies, the role of international organizations, and the specifics of trade policy in developing countries. Other topics might be also discussed, if time permits. This course will give you a sound theoretical background in international trade, introduce you to current empirical research in this area and will help to understand current international economic events.

Required Readings

The required textbook for this course is:

Krugman, Paul, Maurice Obstfeld and Marc J. Melitz, *International Economics: Theory and Policy*, 10th edition, 2015, Prentice Hall.

Occasionally, additional required materials and articles may be assigned to accompany the appropriate chapters in the book. They will be announced in class and be available on D2L. Reading about international economics issues in *The Economist*, *The New York Times*, and *The Wall Street Journal* is highly recommended.

II. COURSE REQUIREMENTS

Course Structure

This course will consist of lectures, readings, in-

Exams

There will be an in-class midterm and an in-class final exam. Midterm exam will be in class on March 1. The Final exam is cumulative. The Final exam will be on May 9, 1:30pm. I will announce in advance which topics will be covered during each exam and the structure of the exams.

There will be no makeup exams.

Paper

The paper assignment will let you look in detail at one country and its international economic relationships. You will choose one country (other than U.S.) and write a paper to answer the following questions.

- a. What are the major import and export commodities? In which industries do you observe a lot of FDI? Have these changed over the last 10 years, and why?
- b. Which countries are its major trading partners? Which countries do foreign direct investment in your chosen country? Where does your country do its FDI?
- c. What are good explanations for these trade patterns, based on what we have studied (factor endowments, technology, etc)? And what explains the FDI patterns? Support your conclusions with facts and evidence from other studies.
- d. Has the country attempted recently to lower its barriers to trade and investment, and how?
- e. Is the country a member of any regional Free Trade Areas? What seem to be the costs and benefits of this membership?

Your paper should be maximum eight double-space pages long, including tables and references.

List of Countries for paper:

North America: Canada, Mexico

South America: Argentina, Chile, Brazil

Western Europe: UK, France, Germany, Italy, Spain, Sweden, Austria, Switzerland, Portugal, Greece

Central Europe: Hungary, Poland, Czech Republic

Eastern Europe: Russia

Africa: Egypt, South Africa, Morocco, Kenya

Middle East: Turkey, Israel

South Asia: India, Pakistan

East Asia:

Thailand, Malaysia, Indonesia, Singapore, HongKong, China, Republic of Korea, Japan

Other: Australia, New Zealand

You will be required to submit a one-page synopsis of your paper by March 6th. The final paper will be due on the last day of class, May 5th.

Sources of information:

This includes major organizations such as The World Bank, International Monetary Fund, Organization for Economic Cooperation and Development, European Commission, ASEAN, Asia-Pacific Economic Cooperation Forum (APEC), Asian Development Bank, African Development Bank, Inter-
