COURSE DESCRIPTION

From General Catalog: Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction.

This course provides a comprehensive introduction to microeconomic theory, focusing on the behavior of households, firms, and the interaction of these agents in the marketplace. Microeconomic theory is used to explain how individuals decide what and how much to buy and how firms decide what and how much to sell under various economic environments (e.g., market structures, taxation, regulation). Extensions and applications will include market failures such as externalities and public goods, investments and net present value, and risk.

Proctorio allows students to complete an assessment at a remote location, such as their home, while helping to ensure the integrity of the exam. There is no cost to use this tool.

Please review [Proctorio Minimum System Requirements](#) to ensure you have the correct hardware and software to use this tool.

COURSE POLICIES

NETIQUETTE

All students should be aware that their behavior impacts other people, even online. I hope that we will all strive to develop a positive and supportive environment and will be courteous to fellow students and your instructor. Due to the nature of the online environment, there are some things to remember.

1. Always think before you write. In other words, without the use of nonverbals with your message, your message can be misinterpreted. So please think twice before you hit submit.
2. Keep it relevant. There are places to chat and post for fun everyday stuff. Do not stray from the discussion in the assigned questions.
3. Never use all caps. This is the equivalent of yelling in the online world. It is not fun to read. Only use capital letters when appropriate.
4. Make sure that you are using
