This course will provide a comprehensive framework for analyzing the behavior of aggregate economies. Why do some countries rich while others remain poor? What causes economic expansion and contraction? What policies, if any, should the government use in combating inflation and unemployment and stimulating growth?

Gregory Mankiw, *Macroeconomics*, 6

th Edition, Worth Publishers.

There is also a companion study guide (*Macroeconomics Study Guide and Workbook*, Roger Kaufman) that gives additional reviews and practice problems. This guide is entirely optional but is a great way to get some extra help.

Your course grade will consist of two midterm examinations, a final, and three problem sets assigned throughout the semester.

Your grade will be determined as follows:

Midterm 1	25%
Midterm 2	25%
Final	30%
2 Problem Sets	20%

Feb. 20		
Feb. 22, 25, 27	4	<i>(quantity theory of money, inflation and interest rates)</i>
Feb. 29 March 3, 5	9	<i>(business cycles, stabilization policy)</i>
March 7,10,12,14	10	<i>(Keynesian cross and the IS curve, Theory of Liquidity Preference and the LM curve)</i>
March 17, 19, 21	11	<i>(fiscal and monetary policy and the IS-LM model, AD curve)</i>
March 24-28		
April 2		
April 4, 7, 9, 11	13	<i>(AS curve, sticky-wage model, imperfect-information model, sticky-price model, the Phillips curve)</i>
April 14, 16, 18	15	<i>(problems in measurement, traditional view of debt vs. Ricardian view)</i>
